<b>Lifelines™ Guitar Cable</b>																																																																																									
	LGC-(length)	G&H Industries 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Phone Plug (6.35mm)	120SXXK .295" O.D. 90% Spiral Shield	Solder	USA	The oversized jacket adds considerable strength and flexibility to the assembly. Kevlar in the core prevents the cable from accidental stretching. Copper stretches; Kevlar does not. The G & H ShowSaver plugs and the unique Lifelines assembly process ensure that the cable is for all practical purposes bulletproof.	When it absolutely, positively has to work and nothing can be left to chance.	\$47.49																																																																																
	LGCL-(length)	G&H Industries 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Male Right Angle Phone Plug (6.35mm)		Solder	USA				<b>Lifelines™ Line Cable</b>											LLC-(length)	G&H Industries 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Phone Plug (6.35mm)	424BXXK .295" O.D. 96% Braid Shield	Solder	USA	This cable's construction is based on transmission line theory. In a nutshell, using 4-conductor microphone cable to replace single-conductor guitar cable, we solder the cable's two red conductors (red and red with white stripe) to the tip on either plug, and solder the cable's two black conductors (black and black with white stripe) to the ground on either plug. We then solder the shield to the ground on the amplifier end and lift the ground (do not solder) the ground on the instrument end. This helps to shunt most of the noise that jumps on the shield to chassis ground before it becomes part of the signal path. This defends the world from guitar players with noisy single-coil pickups and helps quiet them (the pickups; not the guitar players) down to a usable commodity before the drummer shoots the guitar player. The white end of the cable goes into the guitar. The black end of the cable goes into the amplifier.	When it absolutely, positively has to work and nothing can be left to chance, and when you use a noisy single-coil pickup to get your sound.	\$56.49	LLCL-(length)	G&H Industries 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Male Right Angle Phone Plug (6.35mm)	Solder	USA	<b>Lifelines ProPatch™</b>											PP-(length)	G&H Industries 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Phone Plug (6.35mm)	120SX .280" O.D. 90% Spiral Shield	Solder	USA	The professional roadie's choice for pedalboard patch cables, Pro Patch features black ShowSavers connectors and Pro Co's ArmorFlex oversized 120SX cable for a handsome cable with no mechanical handling noise and tremendous flexibility. Because it is designed as a patch cable for less stressful situations, the costs are dramatically reduced compared to its counterparts, but the sound performance is the same. Pro Patch cables lie down flat on stage, are cosmetically "cool" and are available in straight or right angle plug configurations.	Pro Patch cables were designed for professional roadies so that they could rest assured that all the cables in their boss' rig would work right every time - no hums, no buzzes, no crackles. Their bosses only have one chance tonight to make 80 grand. The cables better not be the reason they can't.	\$34.99	PPL-(length)	G&H Industries 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Male Right Angle Phone Plug (6.35mm)	Solder	USA	PPLL-(length)	G&H Industries Right Angle 1/4" Phone Plug (6.35mm)	G&H Industries 1/4" Male Right Angle Phone Plug (6.35mm)	Solder	USA	<b>Excellines™</b>											EG-(length)	Amphenol China 1/4" Phone Plug (6.35mm)	Amphenol China 1/4" Phone Plug (6.35mm)	120S1 .240" O.D. 55% Spiral Shield	Solder	USA	Excellines provide an excellent "crossover" cable, bridging the gap between its bullet-proofed bigger brothers and Pro Co's line of Neutrik®-made StageMASTER cables. It is positioned right in the middle between "really good" and "really cheap (price, that is)". This product does not make any sense to our marketers, but we sell more of these by far than any other guitar cable. They're quiet, reliable, flexible and sell for ten to twenty bucks depending on length. There are over four million of them in use all over the world.	How many guitar players does it take to use four million guitar cables? One if he breaks a lot of them. Four million if no one ever breaks a cable. If you never break a cable, use an Excellines or even a StageMASTER. If you break lots of them, buy a LifeLines.	\$25.99 (18.5')	EGL-(length)	Amphenol China 1/4" Phone Plug (6.35mm)	Amphenol China Right Angle 1/4" Phone Plug (6.35mm)	Solder	USA

# Pro Co Instrument Cables

Brand	Model	Connector A	Connector B	Wire	Assembly Method	Country of Manufacture	Unique Attributes	Why Buy Me?	20' MSRP
StageMASTER™	SEG- (length)	Neutrik China 1/4" Phone Plug (6.35mm)	Neutrik China 1/4" Phone Plug (6.35mm)	Modeled after 120S1 .240" O.D. 55% Spiral Shield	Solder	China	There is always a need for inexpensive products, for starving musicians, civic and religious groups with limited budgets, for price sensitive buyers and for applications in which wear and tear just do not exist. These are made in China by our friends at Neutrik, one of the most respected connector manufacturers in the world.	StageMASTER is the cheapest guitar cable Pro Co makes but it's four times cheaper than the one that's the most expensive. A great way to start with Pro Co until money is no longer the decider for what gear you buy.	\$16.49 (18.5')
	SEGL- (length)	Neutrik China Right Angle 1/4" Phone Plug (6.35mm)	Neutrik China 1/4" Phone Plug (6.35mm)		Solder	China			
	SEGLL- (length)	Neutrik China Right Angle 1/4" Phone Plug (6.35mm)	Neutrik China Right Angle 1/4" Phone Plug (6.35mm)		Solder	China			

Adding an "L" to the part number (e.g. EG "L") tells us to add one right angle 1/4" Phone Plug to the assembly  
 Adding (2) "Ls" to the part number (e.g. EG "LL") tells us to add two right angle 1/4" Phone Plugs to the assembly

### Only LifeLines brand cables are built using the exclusive LifeLines Process

### Only Pro Co gives you the "Any Excuse - Even Abuse" Warranty

- LifeLines™ - Lifetime Unlimited
- Excellines™ - Limited Lifetime, one free replacement
- StageMASTER™ - Limited Lifetime one free replacement
